

Fullbore Non-Return/ Stop Valves

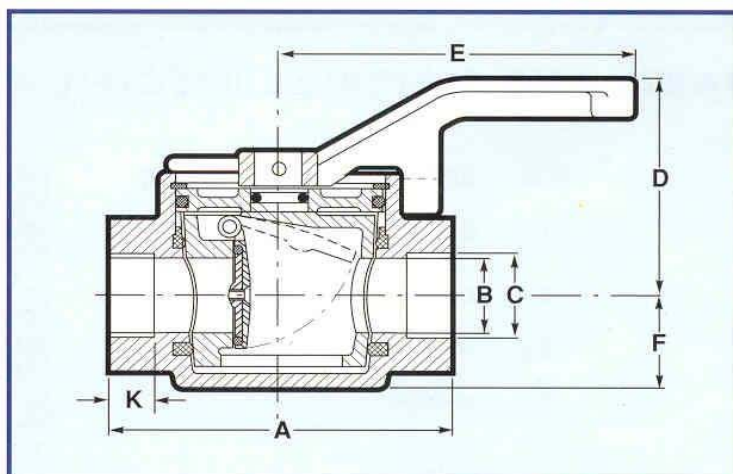

SCREWED CONNECTIONS

Manufactured to extremely high standards in the highest quality materials. These valves operate as normal stop valves when the handle is turned 90° from flow position.

There is a hinged flap incorporated in the plug which acts as a swing check non-return when the plug is turned to the flow position.

Any repair or replacement can be carried out without interference to the pipe system.

SPECIFICATION

SIZES

20mm - 32mm (1" - 1-1/2") nominal bore

BODIES

Cast from gunmetal or aluminium bronze.

ENDS

Screwed NPT or BSP

PLUGS

Cast from gunmetal or aluminium bronze, both surface coated.
