

# Engineering Excellence and LifeTime Support From Brooksbank Valves

## BESPOKE DESIGNS

We custom design valves to meet specific applications including:

- Actuation
- Control Systems
- Stem Extensions
- Safety Changeover
- Safety Testing
- Interlocking

## CUSTOM VALVE DESIGNS

Our engineering design group has the capability of producing customised valve designs specific to your unique applications needs.

## TECHNICAL CONSULTATION

Our design team at Brooksbank Valves will engage with your technical team and provide consultation services, review your requirements and will arrange in depth expertise and guidance in all areas of valve design, selection, suitability, installation and functionality.

## SERVICE AND REPAIR

At Brooksbank Valves we assume a lifetime responsibility to support your needs. We offer a strip and survey service, repair and upgrade programs all from our own facility.

## STOCK PROGRAM

We carry an extensive, certified inventory of standardised stock along with kits of loosely assembled valves. This allows us to respond quickly and effectively to your day to day delivery requirements and facilitate your modification needs.

## SPARES AND REPLACEMENTS

We hold a comprehensive stock of recommended soft and hard spares and replacement parts for both current and legacy designs.
