

We are looking to recruit a hands-on **Design Engineer** to complement our existing design team.

The successful candidate will work as part of a small, highly skilled team developing new and existing product ranges and supporting the sales team with design and technical information. Previous experience of valves is a must for this role.

**Key responsibilities** for the role are:

- Communicate with the other team members and other departments with respect to engineering issues.
- Ensure timely and accurate completion of BOM's and drawings.
- Produce design reports and calculations.
- Detailed knowledge of National and International standards.
- Good knowledge of applications and material selection.
- General problem solving skills.
- Creation of new designs to satisfy specific customer requirements.
- Communicate with sub contract machinists and foundries.
- Experience with Solidworks

**Our ideal candidate with possess the following competencies / personal attributes:**

- Good team working and a team player
- Shows initiative
- Good communicator with excellent customer focus
- Able to demonstrate flexibility and commitment to the role
- Good knowledge of actuation
- Good knowledge of CI
- Be procedure driven and process minded
- Have a knowledge of Efac's or other similar applications

**In return we offer:**

- Competitive salary in line with the experience of the candidate and benchmarked salary levels
- Holiday entitlement of 25 days running January to December, per annum
- Pension contributions above statutory rates
- 36½ hour working week with an early finish on Friday

The successful candidate will need as part of the process to: (i) satisfy basic eligibility criteria/certain conditions of employment (e.g. nationality rules/right to work); (ii) provide appropriate documentation to verify ID, nationality, employment and/or academic history, criminal record (unspent convictions only); and undergo Baseline Personnel Security Standard checks.
